PREFACE

Of 108 pilots and scientists selected as astronauts since April 1959, 62 were on flight status in October 1979 as recruiting began for additional candidates. Thirty-one of the 62 were pilot astronauts and 31 were mission specialist or scientist astronauts.

Eight groups of astronauts have been selected. In Group 1 were the seven Mercury astronauts selected in April 1959. Nine test pilots, Group 2, were selected in September 1962. In Group 3 were 14 pilot astronauts selected in October 1963. Group 4, the first six scientist astronauts, was selected in June 1965. In April 1966, 19 pilot astronauts were selected in Group 5. Group 6, 11 scientist-astronauts, was selected in August 1967. Seven Air Force Manned Orbital Laboratory pilots joined the NASA pilot astronaut program in August 1969, as Group 7.

In January 1978, 35 astronaut candidates were selected by NASA to participate in a two-year training program at the Lyndon B. Johnson Space Center, Houston, Texas. This group of 20 mission specialists and 15 pilots began training in July 1978 and completed training in August 1979, joining the active astronaut corps a year earlier than anticipated as Group 8.

In August 1979, NASA announced that it would begin recruiting astronaut candidates annually. These new astronaut candidates will become Space Shuttle pilots and mission specialists upon completion of training. Announcement of annual recruiting periods will be issued well in advance of the dates when applications will be accepted.
